Education

Year	Degree/Certificate	Institute	CGPA/Percentage
2023–2027	B.Tech Computer Science	Guru Gobind Singh Indraprastha University (GTBIT), Delhi	8.81 CGPA
2022	CBSE (XII) PCM	Akal Academy Kajri, CBSE	87%
2020	CBSE (X)	Akal Academy Kajri, CBSE	91%

Projects

- **Meet AI** *2026*
  Next.js / React / TypeScript / tRPC / Drizzle / PostgreSQL / Stream Video / Python / FastAPI **GitHub | Live Demo**
  – Built an AI-powered video meeting platform that lets users create and join meetings, interact with an AI meeting agent, and manage meeting recordings and transcripts.
  – Implemented meeting creation, video calls, recording, transcription, transcript processing, and secure recording downloads.
  – Developed a Python/FastAPI AI agent that uses speech-to-text, LLM reasoning, and text-to-speech to participate in meetings.
  – Integrated Stream webhooks to track meeting events, start AI agent workflows, and save meeting recordings and transcripts; built agent management with configurable personas and protected routes.
- **AI UGC Ads SaaS** *2026*
  React.js / Node.js / Express.js / PostgreSQL / Prisma / Clerk / Cloudinary / Sentry **GitHub | Live Demo**
  – Engineered a full-stack AI-powered SaaS platform that transforms user prompts and uploaded assets into UGC-style advertisement creatives using generative AI.
  – Built a responsive React dashboard for asset uploads, AI content generation, project management, and generation-status tracking.
  – Developed RESTful APIs with Express.js, Prisma, and PostgreSQL for authentication, project management, credit management, and database operations.
  – Integrated Clerk, Cloudinary, and Sentry for authentication, media storage, and monitoring; implemented validation, rate limiting, centralized error handling, and asynchronous workflows.
- **CMAPSS Engine Remaining Useful Life Prediction** *2026*
  Python / Pandas / NumPy / Scikit-learn / XGBoost / LightGBM **GitHub**
  – Built an end-to-end machine learning pipeline on the NASA CMAPSS dataset to predict Remaining Useful Life using 20+ engine sensor features.
  – Performed feature engineering, preprocessing, normalization, correlation analysis, and evaluated Random Forest, XGBoost, and LightGBM models.
  – Achieved best performance with Random Forest at RMSE 16.99, MAE 12.30, and R^2 0.83; converted RUL predictions into Good/Moderate/Warning health states with 86% classification accuracy.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Developer Tools: Git, GitHub,Vercel
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Achievements

- **LeetCode**,Solved 300+ problems across Data Structures and Algorithms
- **Academic Excellence**,Maintained 8.81 CGPA in B.Tech Computer Science
- **IIT Madras**,Completed Foundation Level of BS in Data Science and Applications

CERTIFICATION

- **BS in Data Science and Applications - Foundation Level** - Indian Institute of Technology Madras
- **Machine Learning A-Z: AI, Python R + ChatGPT Prize** Udemy
- **Python For AI** Dataluminia
- **DSA Summer Training** Guru Tegh Bahadhur Institute Of Technology

Positions of Responsibility

- **SOCIAL MEDIA LEAD**,MINDSCAPE CLUB of GTBIT *2025-PRESENT*
- **STUDENT-MEMBER**,IEEE (Institute of Electrical and Electronics Engineers), GTBIT *2024-2025*
